Graphic Design ui/ux design

PROFESSIONAL EXPERIENCE

HIR/Instructor Rbk rebootcamp

2021 - Present,

Learning full-stack development with JavaScript. Students build scalable websites and mobile apps using React, React Native, Flutter, Node.js, Express, SQL, MongoDB, Prisma, and Redux, gaining hands-on experience for their web and mobile development careers.

Front End Developer NextGen

01/2023 - 06/2023,

NextGen is a forward-thinking startup dedicated to creating a scalable code learning platform. We harness the power of TypeScript and Next.js to deliver a cutting-edge learning experience.

PERSONAL PROJECTS

Bike Building Website (2022 - 2022)

An e-commerce app in which you can build your bike and get its price according to the added features or accessories built with **html**, **css** and **jquery**

Sport App Mobile Application (2022 - 2023)

This app was made to help all people reserve soccer fields or any other sport easily from the comfort of their home.

Technologies used: React native with expo - mui - tailwind - express - jwt - coudinary - MySQL-sequelize

E-learning website (2023 - 2023)

This website was made with the idea of facilitating studying easily online

Technologies: React js - vite - node js - mui - tailwind - css - html - jwt - cloudinary - mysql - sequelize

NextGen (2023 - 2023)

I developed a code learning platform with a team of 5 to simplify coding for students worldwide. Our platform features AI-driven code recognition, interactive games, and quizzes to enhance learning.

Technologies: TypeScript - Next.js - Sequelize - Express.js
